SUMMARY:

Alfie is a beaver style tug with a large open rear deck and a towing post. Ideal as a workboat, small tug, filming platform, camera boat or safety boat on the River Thames in London and connected waterways.

New to the Livett's Launches Group in 2010, she has recently undergone a full refit bringing her up to the high standards of the other boats in the Livett's fleet. Alfie has been fitted with a pusher bow and has rubber fendering fitted all the way around the hull. Alfie's main cabin comprises the steering position and access to the engine room and forward cabin. The forward cabin has been fitted out with a WC and areas for storage.
