CAPACITY	3+1 persons
EQUIPMENT	Collapsible oars; Repair kit; Foot pump; Valise

SUMMARY:

Jackson, sister vessel to River, offers a practical, lightweight inflatable option for filming, safety boat work and survey support in tight areas or when projects require minimal wash. A WavEco ST 260 solid transom dinghy with a wooden slatted floor, Jackson is compact, lightweight and easy to deploy where space, access or storage is limited. Her small size makes her particularly useful for work close to structures, in restricted spaces, or where a minimal footprint is required. She is well suited to filming support, safety cover in confined areas and survey work across suitable waterways.
