MAX MOTOR POWER |	**30hp**
LOADING CAPACITY |	**1350kg**
BOAT WEIGHT |	**113kg**
EQUIPMENT |	**2x seats; Oars**

SUMMARY:

Tesla II, sister vessel to Tesla, is a high-quality inflatable boat with a robust aluminium floor, capable of comfortably seating several people. Built from heavy-duty reinforced PVC with multiple separate air chambers, she is designed for durability and stability without compromising on safety – making her ideal for transporting passengers, crew or dive teams for marine film services, survey work and diving services.

More compact than Tesla, she works effectively in shallow water and close to river walls, jetties and quays. She can also be packed down and transported by road for use on remote waterways throughout the UK or internationally – a versatile choice for filming jobs or safety boat work.
